

Focus Mounting & Framing

Mounting & Framing Solutions

Pixfix

Every application must be tested if suitable for materials and weight, when using adhesives follow manual instructions carefully.

Pixfix will inspire you to be more creative when hanging a sign. Without the need to drill holes in your signage it will secure the sign to the wall invisibly. Thanks to the clever insert system you can simply exchange the panels at anytime. Pixfix is suitable for all materials and can be mounted with screws, adhesive or silicones. The Pixfix can be your perfect solution for mounting photos, wall direction sign systems, POS graphics or any sign that you really want to look high quality with no holes or fixings showing.

How to Use

- Remove adhesive tape foil
- Mount Pixfix to the panel
- Mount the wall support to the wall
- Simply click in your panel

Mounting & Framing Solutions

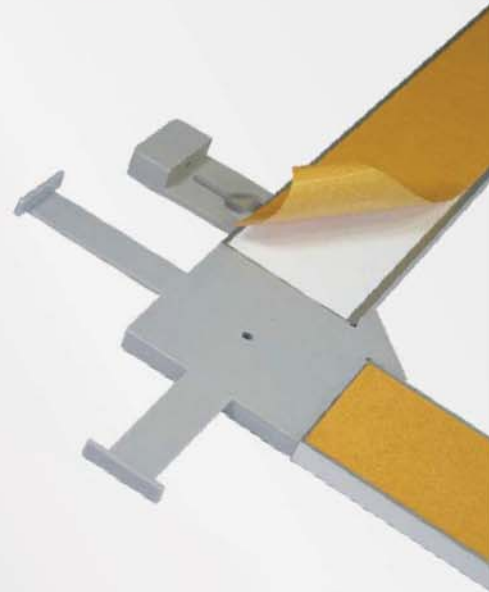

Backframe **NEW**

Backframe is a mounting system especially for thin and flexible panels made of hard-foam, forex or aluminium. It helps to stiffen the panel, while mounting is easy and safe.

The leveling system is particularly convenient for the mounted panel, that can even be up to 10mm, so that your panel will always be straight without drilling new holes.

We provide you with complete sets for common formats. Also available are all lengths extra to create new sizes.

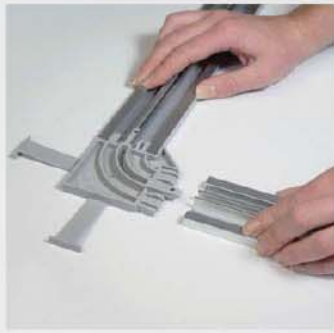

- ✓ Mounting and strengthening of thin, flexible panels.
- ✓ Convenient positioning straps.
- ✓ Adjustable horizontal leveling.

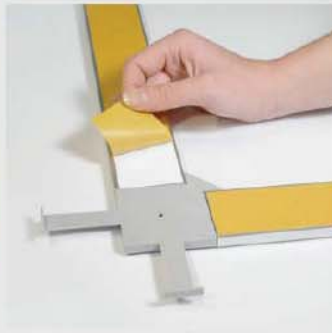

Code	Size
FBAFA3	A3
FVAF700500	700 x 500mm
FBAFA1	A1
FBAF1000700	1000 x 700mm
FBAF14001000	1400 x 1000mm

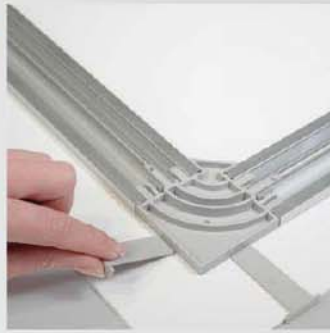

Mounting & Framing Solutions

✓ Assemble frame

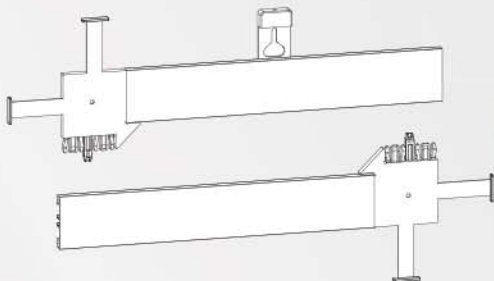

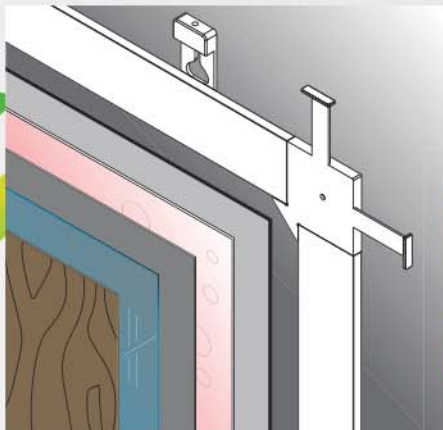

✓ Apply double-sided adhesive tape

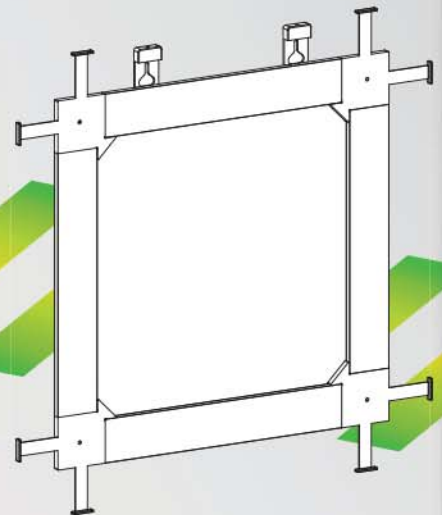

✓ Position frame with positioning straps

✓ Tear away straps to wall mount panel

Plastic Edge Corner

Wall hook with levelling: evens up to 10mm after wall mount

e-Xhibit[®] frame-system **NEW**

The Perfect Frame for Fine Art Prints

Fine art prints, photographs or information panels: The E-Xhibit frame system is the presentation solution for all things on aluminium composite panels-whether in museums or galleries, shop construction, architecture or design. Hidden raw edges and wall clearances of 25mm, 50mm depending on profile, make for a premium presentation of aluminium composite panels.

The system can also be used with plastic or magnetic panels and mirrors up to 3 mm thickness. The panels can be fitted using magnetic and steel tape or adhesive tape.

Size	3,900mm Length
Colour	Silver

Fixings for Freestanding Signs

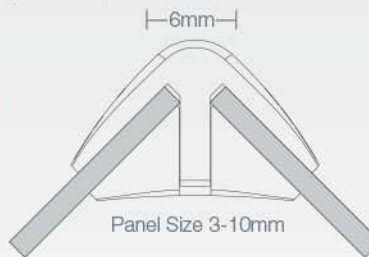

IX Bond connects 3mm – 10mm panels infinitely and free of torsion. The face joint remains at a discrete 6mm. The screw can be mounted from both sides which is convenient if you are creating structures in 3D or close to walls. Ergonomic and decorative recessed grips make mounting easy. Order the required keys separately.
